### Overview

- The Eugene Parks Foundation, in partnership with local health organizations, will launch a Prescribing Parks pilot this spring
- The pilot is focused on youth under 18
- Priority given to Oregon Health Plan-eligible and Latinx community members

### Here's How It Will Work:

- Primary care providers refer at-risk youth, teens, and young adults to a Prescribing Parks resource coordinator.
- The coordinator creates a personalized "play/stay active" prescription.
- Activities are selected based on available programs, ideally close to the participant's residence.

**Pairing Prescriptions with structured programs increases participant commitment!**

### What We Need:

- **Funding for program in 10 different park locations, once a week for 9 months**

**Explore Sponsorship Opportunities**
